

Packaging and delivery

Packaging

For tank gauge Console, Carton, 32cm x 27cm x 42cm (L×W×H), about 11Kgs

For the installation accessories, one carton can packed 8 sets at most, which for 8 probes.

Carton, 32cm x 27cm x 42cm (L×W×H), about 12Kgs.

For SP series probe, the package dimension depends on probe length and quantity. For different transport modes, like by sea or by air, the package is also different. Take an example of SP300-2670mm, 4 probes:

By Sea, first by foam, then by PVC protection tube, finally put into free fumigation wood box, 296cm x 27cm x 33cm (L x W x H), about 40Kgs.

By Air, first by foam, then by PVC protection tube, finally foam again, 310cm x 20cm x 20cm (L x W x H), about 30kgs.

For Air transportation, we also have stainless steel protection tube package, which will need 2 working days for preparing.
